EDUCATION

Caltech Post Graduate Program in AI and Machine Learning

Caltech (California - Remote) - [Capstone Project](#)
2024-2025

Double Degree in Industrial Engineering

INP Grenoble (France)
2014-2015

Master's degree in Management Engineering

Polytechnic of Torino (Italy)
2013-2015

Bachelor's degree in Management Engineering

Polytechnic of Torino (Italy)
2010-2013

Diploma in Classical Studies

Liceo Classico Nicola Zingarelli (Italy)
2005-2010

PROFILE

AI Product & Delivery Leader with 9+ years' experience delivering data and software solutions, mainly in financial services.

Caltech-trained in AI/ML, I bridge technical expertise (Python, TensorFlow, Scikit-learn) with product strategy, agile execution, and business insight.

Operating at the crossroads of DevOps and AI/ML delivery, I support the industrialization of machine learning use cases by ensuring robust deployment pipelines, scalability, and cross-team coordination.

Passionate about GenAI, automation, and data-driven impact.

WORK EXPERIENCES

Scrum Master | Agile Delivery Manager

SOCIETE GENERALE – **Financial AI Program** | Jan 2023 - Present

Led delivery of an AI-powered industrialization program to automate financial control processes, improving accuracy and operational efficiency.

- Orchestrated cross-functional collaboration between DevOps engineers, data scientists, and finance stakeholders across Paris and Bangalore.
- Increased team delivery velocity by 25% by introducing tailored Agile practices and coaching.
- Improved transparency and alignment by implementing real-time dashboards, KPIs, and reporting structures using JIRA and GitHub.
- Removed delivery bottlenecks and enabled smooth deployment of ML models into production environments.

Software Development Project Manager

SOCIETE GENERALE – **BI & Analytics Platform** | Jul 2021 - Dec 2022

Managed the evolution of a shared business intelligence platform serving multiple finance functions and geographies.

- Delivered BI and data visualization initiatives supporting strategic budgeting and reporting processes.
- Enhanced platform adoption by 30% through improved UX design, cross-functional training, and stakeholder engagement.
- Coached Agile best practices across multicultural teams in Paris, Bucharest, and Bangalore to standardize delivery workflows.
- Defined and tracked product KPIs for planning tools supporting senior finance stakeholders.

Agile Delivery Engineer

SOCIETE GENERALE – **Internal Automation Solutions** | Jun 2020 - Jun 2021

Delivered custom tools automating manual finance processes, contributing to impacting reduction in operational workload.

- Designed and implemented Python-based applications and VBA tools tailored to finance analysts' needs.
- Partnered with business owners to identify use cases for automation and translate them into functional MVPs.
- Created real-time monitoring dashboards to track process performance and data quality using Power BI.
- Built internal documentation and led knowledge-sharing sessions across international teams to scale solution adoption.

COMPETENCES

6 / 10

Artificial Intelligence & Machine Learning

8 / 10

Data Analysis & Business Intelligence

7 / 10

Development & DevOps Infrastructure

8 / 10

Agile Project Management & Team Leadership

TECH & TOOLS

AI, Machine Learning & Scientific Computing

- Python
- TensorFlow
- Keras
- Scikit-learn
- SciPy

Data Analysis & Visualization

- Power BI
- DAX
- Microsoft Excel / Office 365

Databases & Querying

- PostgreSQL
- Microsoft SQL Server Management Studio
- VBA

Development Tools

- VSCode
- Atom
- Eclipse
- GitBash
- GitHub

Project & Collaboration Tools

- JIRA (Management & JQL)
- Klaxoon
- Microsoft Teams

LANGUAGES

ITALIAN – Native

FRENCH – Bilingual

ENGLISH – Full professional fluency

SPANISH – Basic understanding

WORK EXPERIENCES

Agile Software Engineer

ALTRAN for Société Générale – **Financial Applications** | *Dec 2017 – May 2020*

Built and maintained Python/VBA software solutions supporting finance reconciliation and reporting pipelines.

- Developed modular applications with PyQt interfaces, enabling non-technical users to control and visualize outputs.
- Reduced manual reporting time by 40% through automation of recurring reconciliation tasks.
- Worked in an Agile delivery model, applying XP principles and version control (GitHub, JIRA) to accelerate releases and improve code quality.
- Supported infrastructure migration and tech stack modernization for legacy systems.

Business Analyst – Data Classification Project

NEONEC – **Global Steel Manufacturer** | *Sep 2016 - Nov 2017*

Led a data classification project that cut inventory costs by standardizing materials taxonomy through algorithmic methods.

- Built a classification algorithm using Python and PostgreSQL to structure and consolidate legacy inventory data.
- Presented recommendations to C-level executives and collaborated with procurement and logistics teams for rollout.
- Initiated the company's first attempt at algorithmic data governance.

Inside Sales Representative

HEWLETT-PACKARD ENTERPRISE – **Barcelona (SMB Division)** | *Feb 2016 - Aug 2016*

- Contributed to revenue growth by tailoring consulting service packages (cloud, networking, storage) to small and medium businesses.
- Collaborated with solution architects to align technical specs with client objectives.

Junior Consultant

ACCENTURE – **Michelin Facility Management Program** | *Jul 2015 – Dec 2015*

Supported design and implementation of an outsourced facility management program projected to increase cost savings.

- Drafted tenders and defined supplier KPIs aligned with Michelin's internal standards
- Led stakeholder engagement between procurement, legal, and engineering departments.
- Modeled spare parts processes and suggested improvements using Excel simulations and lean principles.
